

— PORTFOLIO OVERVIEW

Product Strategy & Digital Operations

I turn fragmented digital operations into scalable product systems.

I connect customer experience, technology, data, and operational workflows to create digital products that are easier to use, manage, measure, and grow. My work spans product architecture, commerce platforms, analytics, workflow design, and governed AI production.

+1,329%

CONSENTED AUDIENCE

Grew from approximately 700 to 10,000 subscribers.

+550%

CONVERSIONS · YEAR 1

Campaign-attributed conversion growth.

+98% / +60%

CONVERSIONS · YEARS 2-3

Sustained campaign-attributed gains.

Fully green

CORE WEB VITALS

Real-user performance moved from failing to passing.

— WHAT I BRING

01 · PRODUCT & STRATEGY

Translate ambiguity into requirements

Product ownership, prioritization, stakeholder translation, and practical implementation.

REQUIREMENTS · PRIORITIZATION · DELIVERY

02 · SYSTEMS & OPERATIONS

Design the structure behind the work

Information architecture, workflow design, governance, QA, documentation, and change enablement.

IA · WORKFLOWS · GOVERNANCE

03 · COMMERCE & GROWTH

Connect platforms to customer outcomes

Shopify, analytics, search, lifecycle, merchandising, and conversion systems.

SHOPIFY · GA4 · KLAVIYO · SEO

04 · AI-ASSISTED OPERATIONS

Use automation without losing control

Human-in-the-loop content and imagery systems with defined sources, confidence standards, and review gates.

AI WORKFLOWS · QA · HUMAN REVIEW

— SELECTED WORK

Four case studies. One deliberate hierarchy.

The flagship establishes the breadth of the transformation. Two related deep dives show product infrastructure and analytical reasoning in detail. The consulting engagement proves focused diagnosis and delivery outside the flagship environment.

01 · FLAGSHIP TRANSFORMATION

Luxury E-Commerce Digital Ecosystem Transformation

Rebuilt a fragmented digital ecosystem into a connected commerce, content, analytics, and customer-growth operation.

PRODUCT STRATEGY · SHOPIFY · DIGITAL OPERATIONS

02 · INDEPENDENT CONSULTING ENGAGEMENT

Multi-Platform Systems Diagnostic & Rebuild

Diagnosed a blocked commerce launch, reframed scope, isolated product-data defects, and created a phased path to implementation.

CONSULTING · SYSTEMS DIAGNOSIS · TECHNICAL DELIVERY

03 · RELATED DEEP DIVE FROM FLAGSHIP

From Manual Product Entry to a Governed Commerce System

Designed structured product-information architecture and human-in-the-loop workflows connecting product truth, Shopify, content, imagery, and AI-assisted production.

PRODUCT OWNERSHIP · INFORMATION ARCHITECTURE · AI GOVERNANCE

04 · RELATED DEEP DIVE FROM FLAGSHIP

Diagnosing Revenue Decline in a Mobile-First Commerce Ecosystem

Connected behavioral, technical, search, and financial evidence to separate traffic loss from conversion performance and prioritize recovery opportunities.

ANALYTICS · REVENUE MODELING · GROWTH STRATEGY

HOW I WORK

A systems approach that still ships.

This is not a rigid textbook framework. It is the sequence I use to move from ambiguity to implementation while keeping business constraints and customer outcomes visible.

01

Understand the system

Connect customer needs, business constraints, technology, data, and operational reality.

02

Define the problem

Separate symptoms from causes and translate ambiguity into requirements.

03

Design the structure

Create information architecture, workflows, governance, ownership, and QA.

04

Deliver and validate

Implement, test, measure, document, and improve in a live operating environment.

CORE CAPABILITIES

Product Strategy & Ownership

Requirements, prioritization, opportunity definition, user stories, acceptance criteria, stakeholder translation.

Systems & Workflow Design

Operating models, process architecture, governance, QA, documentation, and change enablement.

Information Architecture

Product data, taxonomy, metafields, structured content, controlled vocabularies, and source-of-truth design.

Analytics & Optimization

GA4, segmentation, behavioral analysis, Core Web Vitals, revenue modeling, and diagnostic framing.

Commerce & Growth Systems

Shopify, Klaviyo, SEO, merchandising, lifecycle strategy, and conversion optimization.

AI-Assisted Operations

Human-in-the-loop workflows for product content, imagery, metadata, and repeatable production quality.

EXPERIENCE

From interface design to product systems leadership.

The through-line is translation: making complex business and technical environments legible, structuring the work, and carrying it through delivery.

2025 - Present**INDEPENDENT****Product Owner & AI Systems Consultant**

AI-enabled workflow design, product systems architecture, digital transformation, and a recent luxury-retail commerce diagnostic.

2022 - 2025**SHOWROOM****Product Owner, Digital & AI Systems / Digital Director**

Owned the digital ecosystem across Shopify, product architecture, analytics, lifecycle marketing, merchandising, SEO, and AI-assisted operations.

2021 - 2022**WINDSTREAM WHOLESALE****Project Coordinator II / Service Delivery**

Translated customer requirements into technical delivery plans and coordinated execution across sales, operations, and engineering.

2020 - 2021**WORKABLE LOGIC****Lead Designer / UX & Operations Support**

Translated business requirements into UX flows, information architecture, and interaction logic in direct partnership with engineering.
