PRODUCT OWNER | DIGITAL OPERATIONS | AI SYSTEMS

Charlotte, NC | 704-200-7279 | Email | LinkedIn | Portfolio

PRODUCT & UX

Product Ownership • Requirements Definition • User Stories • Acceptance Criteria • Information Architecture • User Flows • Wireframing

SYSTEMS & OPERATIONS

Workflow Design • Taxonomy • Governance • QA • Documentation • Stakeholder Translation • Change Enablement

COMMERCE & GROWTH

Shopify • PDP / Metafield Architecture • GA4 • Search Console • Klaviyo • SEO • Lifecycle Strategy • Conversion Optimization

TOOLS & PLATFORMS

Core: Shopify • GA4 • Search Console • Klaviyo • HTML / CSS • Adobe CC • LLM workflows

Working: Figma • Webflow • Jira • Notion • Airtable • Quickbase • Prism • Lightspeed

STRENGTHS

Systems Thinking • Rapid Learning • Clarity Building • Outcome-Driven Decisions • Cross-Functional Leadership

SELECTED IMPACT

Audience: ~700 to 10,000 (+1,329%)
Campaign conversions: +550% (year 1)
Campaign conversions: +98% / +60% (years 2-3)
Core Web Vitals: failing to fully green

EDUCATION

Software Development - Coding
Tech Talent South, Charlotte, NC
General Studies
Central Piedmont Community College,
Charlotte, NC

SUMMARY

Systems-oriented Product Owner and digital operations leader with 5+ years translating ambiguous business needs into functional requirements, product architecture, and scalable workflows across commerce, UX, analytics, and technical delivery. Currently advising brands on AI-enabled operations and product systems; previously owned the digital ecosystem for a luxury multi-brand retailer. Known for connecting customer experience, data, platforms, and operating reality, then carrying the solution from diagnosis through implementation.

WORK EXPERIENCE

Product Owner & AI Systems Consultant (Independent)

Sep 2025 - Present | Freelance | Charlotte, NC (Remote)

Advise brands and teams on AI-enabled workflow design, product systems architecture, and digital transformation.

- Define product requirements, system logic, and governance for AI-assisted content operations, product-data systems, and internal tooling.
- Translate ambiguous needs into information architecture, phased workflows, QA criteria, and implementation plans.
- Advise on PDP, SEO, structured content, and automation architecture to improve scalability and operational clarity.

Recent Engagement - Luxury Retail

Independent Consulting Engagement | 4 weeks

- Rapidly learned Prism and Lightspeed, then diagnosed a three-year blocked e-commerce launch across three disconnected systems; found actual catalog scope approximately 12x the intake estimate and reframed work into phased delivery.
- Built a pre-import data workflow to resolve handle-collision defects before Shopify ingestion and documented repeatable controls.
- Architected and validated an AI-assisted image-production proof of concept with confidence standards, QA gates, and human approval.

Product Owner, Digital & AI Systems / Digital Director

2022 - 2025 | SHOWROOM | Charlotte, NC

- Owned the end-to-end digital ecosystem across Shopify, product architecture, lifecycle marketing, analytics, merchandising, SEO, and digital production for thousands of SKUs.
- Defined schema, user stories, acceptance criteria, taxonomy, and QA with engineering; designed governed PDP and metafield systems supporting reusable product data.
- Expanded the consented subscriber ecosystem from approximately 700 to 10,000 (+1,329%).
- Increased campaign-attributed conversions 550% in year one, 98% in year two, and 60% in year three.
- Moved real-user Core Web Vitals from failing to fully green: LCP 28% faster, INP 70% faster, and CLS 90% lower.

Project Coordinator II / Service Delivery

2021 - 2022 | Windstream Wholesale | Remote

- Translated customer and business requirements into executable technical delivery plans for complex wholesale services.
- Used Jira to coordinate requirements, handoffs, fulfillment, and blockers across sales, operations, and engineering.

Lead Designer / UX & Operations Support

2020 - 2021 | Workable Logic | Charlotte, NC

- Translated business requirements into UX flows, information architecture, and interaction logic for a membership ID-scanning mobile app.
- Partnered with engineering to align interface decisions with technical constraints and implementation feasibility.
