

ERIN CARTER

PRODUCT OWNER & AI SYSTEMS DESIGNER

Charlotte, NC | 704-200-7279 | [Email](#) | [LinkedIn](#) | [Portfolio](#)

UX & TECHNICAL FOUNDATIONS

UX Architecture, IA Modeling, User Flows, Wireframing, Figma, GA4, HTML/CSS

PRODUCT & AI SYSTEMS

Product Ownership, Requirements Translation, Functional Logic Design, AI Workflow Automation, System Architecture

E-COMMERCE & PLATFORM SYSTEMS

Shopify Platform Logic, PDP Architecture, Metafield Taxonomy, SEO Metadata, Structured Content Systems

CROSS-SYSTEM INTEGRATION

Requirements bridging between customer-facing platforms and backend/ERP systems, technical dependency mapping, stakeholder translation

TOOLS

Hands-on: Shopify, GA4, Search Console, Klaviyo, HTML/CSS, Adobe Creative Cloud, and LLM-assisted workflows.
Working familiarity: Figma, Webflow, Jira, Notion, Airtable, and Quickbase.
Recent engagement systems: Prism and LightSpeed.

STRENGTHS

Systems Thinking • Rapid Learning • Clarity-Building • Outcome-Driven Decision Making • Cross-Functional Leadership

EDUCATION

Software Development – Coding
Tech Talent South, Charlotte, NC

General Studies

Central Piedmont Community College, Charlotte, NC

Ongoing Development

UX Systems • Digital Product Thinking • E-commerce Architecture • AI Workflow Design

SUMMARY

Product Owner & AI Systems Consultant with 5+ years translating business and platform logic into functional UX requirements across e-commerce, product, and technical delivery environments. Currently advising brands independently on AI-enabled workflow design and product systems architecture, most recently diagnosing and rebuilding a blocked e-commerce launch end to end. Previously led the digital ecosystem rebuild for SHOWROOM, a luxury e-commerce retailer, architecting PDP and metafield systems and improving Core Web Vitals from red to green. Operates at the intersection of platform architecture, UX logic, and cross-system integration, translating ambiguous business needs into functional specifications that engineering and design teams can build against.

WORK EXPERIENCE

Product Owner & AI Systems Consultant (Independent)

Sep 2025 - Present | Freelance | Charlotte, NC (Remote)

Advising brands and teams on AI-enabled workflow design, product systems architecture, and digital transformation. Operating in a Product Owner capacity to define requirements, structure systems, and guide implementation of scalable digital and AI-assisted solutions.

- Define and structure AI-assisted workflows supporting content operations, product data systems, and internal tooling.
- Translate business needs into product requirements, system logic, and automation frameworks.
- Advise on PDP, SEO, and content system architecture to improve scalability and operational clarity.

Recent Engagement, Elizabeth Bruns, Inc. (Luxury Retail)

- Diagnosed a blocked e-commerce launch across three disconnected systems and reframed project scope after discovering the actual catalog size was twelve times the original estimate, then built a repeatable intake-to-publish system instead of a one-off fix.
- Architected and validated an agentic AI pipeline as a hands-on proof of concept: an orchestration layer directing an image-generation model through a defined QA process with human review gates.
- Defined confidence-flagged governance standards for AI-generated content so output stayed auditable rather than opaque.

Product Owner, Digital & AI Systems / Digital Director

2022 - 2025 | SHOWROOM | Charlotte, NC

- Owned the end-to-end digital ecosystem for a luxury multi-brand e-commerce retailer: PDP architecture, metafield taxonomy, SEO metadata, and structured content standards across thousands of SKUs.
- Defined system logic and functional requirements in direct partnership with engineering, including data schema, user stories, and acceptance criteria, vetting business requirements before they reached the design/build stage.
- Expanded the consented subscriber ecosystem from approximately 700 to 10,000 (+1,329%), per annual performance reporting.
- Increased campaign-attributed conversions 550% in year one, 98% in year two, and 60% in year three, per annual performance reporting.
- Implemented AI-assisted workflows for descriptions, metadata, and alt text with human-in-the-loop governance, then improved Core Web Vitals to fully green (LCP +28%, INP +70%, CLS +90%).

Project Coordinator II / Service Delivery

2021 - 2022 | WINDSTREAM WHOLESALE | Remote

- Translated customer and business requirements into executable technical delivery plans, functioning as the bridge between sales-facing needs and backend engineering execution.
- Vetted incoming requirements from business stakeholders and managed the end-to-end coordination process from request through technical fulfillment, using Jira and Quickbase to track handoffs and status.
- Served as the communication bridge between sales, operations, and engineering, clarifying next steps and resolving blockers throughout complex, multi-system delivery processes.

Lead Designer / UX & Operations Support

2020 - 2021 | WORKABLE LOGIC | Charlotte, NC

- Translated business and functional requirements into UX flows, IA, and interaction logic for a membership ID-scanning mobile app, working directly with engineering to vet feasibility.
- Guided interface logic and navigation patterns within design tooling, aligning UX decisions to technical constraints rather than working in isolation from the build.
